Election/Restriction

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

(I) the specifics of the device being comprised of the particular details of the terminals' distance (claims 1-3, 14);

(II) the specifics of the device being comprised of the particular details of the anisotropic conductive film formed separately/common for each semiconductor device(claims 4-6);

((III) the specifics of the device being comprised of the particular details of the anisotropic conductive film having a particular melting point (claims 7, 10);

(IV) the specifics of the device being comprised of the particular details of the conductive beads (claims 8, 9, 11);

(V) the specifics of the device being comprised of the particular details of the surfaces of the terminals covered with a material layer incapable of oxidized (claim 12);

(VI) the specifics of the device being comprised of the particular details of the terminals or their surfaces covered with Au (claim 13).

2. If species II is elected above, a further election of one of the following patentably distinct species of the claimed invention:

(IIa) the specifics of the device being comprised of the anisotropic conductive film connecting the terminals in common (claim 5);

(IIb) the specifics of the device being comprised of the anisotropic conductive film connecting the terminals separately (claim 6).

3. If species IV is elected above, a further election of one of the following patentably distinct species of the claimed invention:

(IVa) the specifics of the device being comprised of the conductive beads for connecting the terminals of the LCD being higher in density than the conductive beads for connecting the terminals of the printed circuit board (claim 8);

(IVb) the specifics of the device being comprised of the conductive beads for connecting the terminals of the LCD being larger in size than the conductive beads for connecting the terminals of the printed circuit board (claim 9);

(IVc) the specifics of the device being comprised of the conductive beads contained in the anisotropic conductive film being set larger than the thickness of an insulating film which exposes the terminals of the printed circuit board (claim 11).

4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 2871

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
